COMPARISON CHART OF CALIFORNIA COUNTY CHARTER PROVISIONS

This chart was prepared to facilitate comparison of selected provisions of California County Charters.

The absence of any specific charter provision does not necessarily indicate a need for such a provision in the charter as the same end might be accomplished by county ordinances or by general law provision.

The first five lines of the chart contain pertinent facts which would be helpful in gaining insight into the nature of each specific county. A limited comparison with the San Francisco City and County Consolidated Charter was made and was confined to provisions relatively unaffected by the integrated San Francisco City governmental structure.

The charter provisions of California Counties were also compared with selected provisions contained in the Model County Charter which was prepared by the National Municipal League, 1956.
